

Mariem Guibene

Software Engineering — Web & Mobile Developer
Sousse, Tunisia — mariemguib@gmail.com — 96201966
LinkedIn — GitHub — Portfolio

Professional Summary

Software Engineer specialized in web and mobile development, with hands-on experience across frontend, backend and application architecture. Experienced with React, React Native, Spring Boot, microservices, REST APIs, databases and Docker. Motivated to contribute to modern software projects while continuously expanding my technical expertise.

Professional Experience

Web & Mobile Developer Intern – IWARE Feb. 2026 – Jun. 2026

- Designed and developed a loyalty management platform for companies, partner stores and promotional offers.
- Developed web and mobile applications using React, React Native and Spring Boot.
- Implemented a microservices architecture with Spring Boot, Eureka Discovery Server and OpenFeign.
- Developed and integrated REST APIs for communication between frontend applications and backend services.
- Used MySQL for database management and Docker for containerization and deployment.
- Contributed to CI/CD pipelines for automated application builds and deployment.

Web Development Intern – GPRO Consulting, Sousse Jul. 2025 – Aug. 2025

- Developed a Human Resources management system.
- Implemented frontend interfaces using React and backend services using Node.js.
- Managed application data using MongoDB.

IoT Final Year Project Intern – GPRO Consulting, Sousse Feb. 2023 – Jun. 2023

- Developed a real-time production monitoring system using RFID technology.
- Built backend services with Spring Boot and frontend interfaces with Angular.
- Integrated Raspberry Pi devices for data acquisition.

IT Intern – Draxlmaier, Sousse Jul. 2022

- Provided technical support and computer maintenance.
- Assisted with hardware configuration and network troubleshooting.

Education

Engineering Degree in Software Engineering
EPI Digital School – Sousse 2023 – 2026

Bachelor Degree in Computer Systems Engineering
ISITCOM – Sousse 2020 – 2023
Specialization: IoT and Embedded Systems

Projects

Fideli – Loyalty Management Platform

- Full-stack platform managing companies, partner stores and promotional offers.
- Technologies: React, React Native, Spring Boot, Microservices, MySQL, Docker.

Greenly – Smart Plant Care Mobile Application

- Developed a mobile application that helps users intelligently manage and care for their plants.

- Combined real-time weather data, plant type and location to optimize watering reminders.
- Provided personalized plant care tips based on local environmental conditions.
- Technologies: Flutter, Dart, Firebase, Weather API.

AdoptiPet – Pet Adoption Web Platform

- Developed a MERN application for pet adoption, temporary care and product management.
- Technologies: MongoDB, Express.js, React, Node.js.

FarmHealth – Tomato Disease Detection using AI

- Developed an image analysis application for detecting tomato leaf diseases.
- Technologies: Python, TensorFlow, Flask, React.

Technical Skills

Programming Languages: Java, JavaScript, Python, Dart

Frontend: React, React Native, Angular, Flutter, Bootstrap, TailwindCSS

Backend: Spring Boot, Node.js, REST APIs, Microservices

Databases: MySQL, MongoDB, PostgreSQL, Firebase

DevOps: Docker, Git, GitLab CI/CD, Nginx

Testing and Tools: Selenium, Postman, Swagger

AI / Data: TensorFlow, Machine Learning, Image Processing

IoT: Arduino, Raspberry Pi, Sensors

Languages

French: Fluent

English: Intermediate

Arabic: Native
